

Supporting Maths Mastery Skills

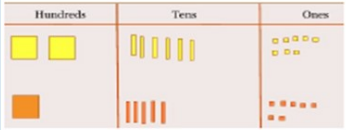

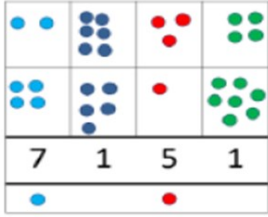

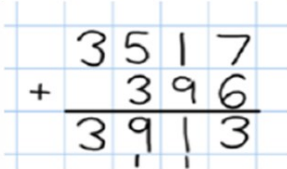

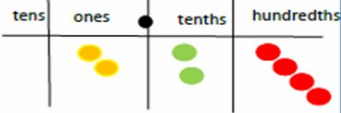

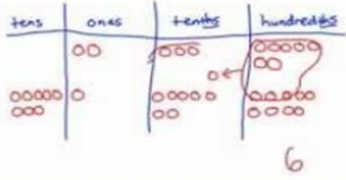

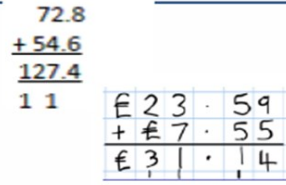

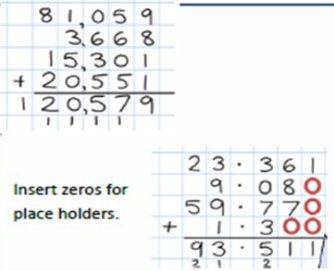

Year 4

This booklet aims to show you, as simply as possible,
how to help your child in Maths.

ADDITION

In Year 4, when pupils are confident with column addition they will extend to four digit numbers. If they still find adding hard they will label each column with the headings Th, H, T and U. At this stage the children can still use place value counters to see the exchange in each column when it takes place.

Objective & Strategy	Concrete	Pictorial	Abstract
Y4—add numbers with up to 4 digits	<p>Children continue to use dienes or pv counters to add, exchanging ten ones for a ten and ten tens for a hundred and ten hundreds for a thousand.</p> 	 <p>Draw representations using pv grid.</p>	 <p>Continue from previous work to carry hundreds as well as tens. Relate to money and measures.</p>
Y5—add numbers with more than 4 digits. Add decimals with 2 decimal places, including money.	<p>As year 4</p>  <p>Introduce decimal place value counters and model exchange for addition.</p>	<p>2.37 + 81.79</p> 	
Y6—add several numbers of increasing complexity Including adding money, measure and decimals with different numbers of decimal points.	As Y5	As Y5	 <p>Insert zeros for place holders.</p>

 + 5 \quad 4 \quad 9 \quad 3 \\
 \hline
 7 \quad 8 \quad 6 \quad 1
 \end{array}$$

SUBTRACTION

Year 4, pupils will record their work as column subtraction. Once the children are confident with the column method they will start to extend their recordings to working with four digit numbers. Place value counters at this stage will allow the children once again to visually see what is happening to the number

MULTIPLICATION

Year 4, the children are expected to multiply a three digit number by a single digit number using a written calculation. Using a range of counters, dienes and multiplication grids allows the children to explore what is happening to the number at this stage.

<p>Grid method recap from year 3 for 2 digits x 1 digit</p> <p>Move to multiplying 3 digit numbers by 1 digit. (year 4 expectation)</p>	<p>Use place value counters to show how we are finding groups of a number. We are multiplying by 4 so we need 4 rows</p>  <p>Calculations 4×126</p> <p>Fill each row with 126</p>  <p>Add up each column making any exchanges needed</p>	<p>Children can represent their work with place value counters in a way that they understand.</p> <p>They can draw the counters using colours to show different amounts or just use the circles in the different columns to show their thinking as shown below.</p> 	<p>Start with multiplying by one digit numbers and showing the clear addition alongside the grid.</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td>x</td> <td>30</td> <td>5</td> </tr> <tr> <td>7</td> <td>210</td> <td>35</td> </tr> </table> <p style="text-align: center;">$210 + 35 = 245$</p>	x	30	5	7	210	35

DIVISION

In Year 4, pupils begin to record division of three digit numbers by drawing 'half a goalpost' as shown below. Children will then extend division calculations which will include a remainder. The children will start with counters so they visually see the remainders.

$$\begin{array}{r}

Year 4 I can statements

By the end of year 4 your child should be able to achieve the following I can statements.

Number - Place Value

- I can count in multiples of 6, 7, 9, 25 and 1,000.
- I can find 1,000 more or less than a given number.
- I can count backwards through zero, including negative numbers.
- I can recognise place value in four-digit numbers.
- I can order and compare numbers beyond 1,000.
- I can round any number to the nearest 10, 100 or 1000.
- I can read Roman numerals to 100 (I to C).

Number - Addition and Subtraction

- I can add 4-digit numbers using the formal written method.
- I can subtract 4-digit numbers using the formal written method.
- I can estimate and use inverse operations to check answers to a calculation.
- I can solve addition and subtraction two-step problems, deciding which operations and methods to use and why.

Number - Multiplication and Division

- I can recall multiplication tables up to 12×12 .
- I can use place value and number facts to carry out mental .
- I can recognise and use factor pairs and commutativity in mental calculations.
- I can multiply two-digit and three-digit numbers by a one-digit number using formal written layout.
- I can solve problems involving multiplying and adding, including using the distributive law to multiply two-digit numbers by 1 digit.

Please help your child become familiar with their times tables.
